

FI – Real-Time

Live snapshot of your current production performance – updated every 30 seconds.

Your Challenge

You are lacking visibility on your shop floor, which makes it very difficult to keep up with everything that's going on! You need an accessible solution that allows you to easily monitor production with complete and real-time information... no matter if you're working at the office or from home.

Our Solution

Factory Intelligence is a web-based dashboard that allows users to efficiently monitor line and machine performance for the entire factory. With Factory Intelligence, users can monitor the current status of production at all times, be alerted to any issues or changes immediately, and react quickly to ensure that production stays running smoothly.

30 Updated every 30 seconds

Real-time dashboards are an excellent tool for every single person involved in SMT. Especially during this pandemic, **some of our colleagues have been working from home and this tool allows them to look at the current SMT line status.**

AVIGILON
a Motorola Solutions Company

Benefits

Provides complete visibility

Includes most types of SMT machines, making it easy to keep up with what's always going on.

Offers enhanced flexibility

View data at the factory, line and machine level, with configurable metrics for each line and machine.

Improves accessibility

Our centralized, easily accessible dashboards provide at-a-glance status updates from anywhere

Enhances overall efficiency

No more calling, emailing or texting colleagues – checking status is as simple as loading a web page from any device.

Features

1 Web Interface:

FI web-based interface allows you to view your data on any device with a web browser, including PCs, tablets, and mobile phones.

2 Real-time data near your lines:

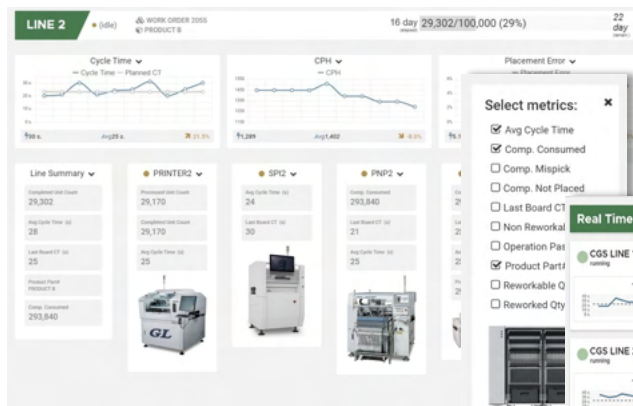

FI is a great way to display dashboards over your production lines for you to get a complete view your machines KPIs.

3 Customizable KPIs:

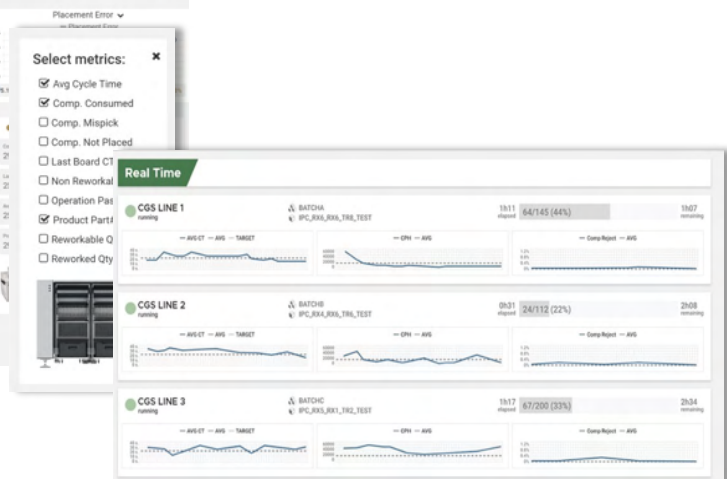

Customize your KPIs for every machine, line and/or factory. With our rich set of live metrics within our SMT-specific metrics database, you can choose KPIs that are relevant & meaningful to your manufacturing operation.

4 Playback Feature:

Factory Intelligence offers a playback feature for users to review past production events.
